

# Review: Creating Internet Literacy

Name \_\_\_\_\_ Date \_\_\_\_\_

**Your Turn** Answer each of the questions below. Then discuss your answers in class.

1. Define “server” and “client.” What are the implications of cloud computing?

---

---

---

2. What is a router in a local network? What types of connectivity might it support?

---

---

3. How is Bluetooth similar to and different from Wi-Fi? How is mobile telephony different from both?

---

---

---

4. Name at least four possible Internet connection types.

---

5. What is the function of HTML? CSS? JavaScript? How does server-side code relate to these?

---

---

---

6. What is the definition of clip art?

---

7. How might you incorporate art, photos, and video into your academic work?

---

---

8. How are copyright, patent, and trademark similar and different?

---

---

---
