

Math Performing Projects

Pre-Algebra

Basic Speech

Develop an informational speech about careers in which mathematics plays a primary role.

Demonstration Speech

Create a speech showing how to complete a basic mathematical operation, such as dividing fractions and mixed numbers.

Live Interview

Interview an individual in your community who uses basic mathematics in his or her job.

Debate

Prepare a formal discussion about a controversial issue related to the math curriculum, such as the value of using calculators in math classes.

Play

Stage an original play (serious or satiric) in which the math you have studied plays a key role.

Algebra

Basic Speech

Develop an informational speech about the background and history of the study of algebra.

Demonstration Speech

Create a speech showing how to complete an algebraic function, such as adding integers.

Live Interview

Interview an individual (local or otherwise) who uses algebra on the job.

Debate

Prepare a formal discussion focusing on the value of algebra in the math curriculum.

Play

Stage an original play (serious or satiric) in which your study of algebra plays a key role.

Geometry

Basic Speech

Develop an informational speech that examines the history/development of the study of geometry.

Demonstration Speech

Create a speech showing how to complete a geometric operation, such as measuring angles (basic) or drawing a tessellation (challenging).

Live Interview

Interview an individual (local or otherwise) who uses geometry on the job.

Debate

Prepare a formal discussion focusing on the value of geometry in the math curriculum.

Play

Stage an original play (serious or satiric) in which your study of geometry plays a key role.
