Write for College

A Student Handbook

$19.95

ISBN (softcover): 978-1-946391-01-8

Write for College prepares juniors and seniors in high school for success at universities and on the job. This handbook teaches critical skills in writing, thinking, reading, speaking, studying, researching, and test taking. In addition to guiding students through challenging academic forms, the handbook also helps them write in science, social studies, and math—and on the job! Fully updated with MLA 8 research and Common Core correlations, Write for College helps your students grab hold of their futures.

- The Process of Writing helps students improve their prewriting, drafting, revising, and editing.
- The Forms of Writing help students write narrative, explanatory, argument, literary, creative, research, and workplace forms.
- The Tools of Learning teach skills for learning in every class and throughout life.
- The Proofreader’s Guide helps students with punctuation, mechanics, grammar, usage, and sentences.

Citing Sources

Guidelines for In-Text Citations

The simplest way to credit a source is to insert the information (usually the author and page number) in parentheses after the words or ideas taken from that source. These in-text citations (often called “parenthetical references”) refer to the “Works Cited” page at the end of your paper. (See page 338.)

Points to Remember

- Make sure each in-text citation clearly points to an entry in your list of works cited. Use the word or words by which the entry is alphabetized.
- Keep citations brief and integrate them into your writing. (See pages 334–337.)
- When paraphrasing, make it clear where your borrowing begins and ends. Use stylistic cues to distinguish the source’s thoughts (“Kalmbach points out . . .”) from your own (“I believe . . .”).
- For inclusive page numbers larger than 99, give only the two digits of the second number (113–114, not 113–114).
- At the end of a sentence, place your parenthetical reference before the end punctuation.

Model In-Text Citations

One Author: A Complete Work

You must give the author’s last name in a parenthetical citation unless it is already mentioned in the text. An in-text citation could name an editor, a translator, a speaker, or an artist, instead of an author, if that is how the entry is listed in the works-cited section.

With Author In Text (This is the preferred method.)

In his book Anger, Robert Kalmbach recommends that the U.S. government develop a new foreign policy to help Third World countries overcome poverty. (Kalmbach)

Without Author In Text

No Need for Hunger recommends that the U.S. government develop a new foreign policy to help Third World countries overcome poverty (Spitzer). NOTE: Do not offer page numbers when citing complete works, articles in alphabetical encyclopedias, one-page articles, and unpaginated sources.

### Writing Guidelines

#### Prewriting

Choosing a Topic

To come up with a good cause-effect essay topic, think about recent changes to your school, community, or environment. Also consider important events in history that have a clear cause-effect relationship.

Gathering Details

Next, research the causes and effects of your topic. Causes explain why something happened. Effects explain the results of what happened. You can use a cause-effect chart to track your results.

| Cause: Poaching | Effect: Endangered species |
| Cause: Urbanization | Effect: Ecosystem disruptions |
| Cause: Land cultivation |

Choose a Focus

As you continue your research, look for a clear cause-effect relationship. For example, you could make a clear connection between poaching and declining elephant populations. Once you’ve established clear causes and effects, write a thesis statement that explains the main connection.

Thesis statement: Poaching and loss of habitat are driving elephants toward extinction.

Beginning Cause(s) Effect(s)

Ending

The ending reflects thoughtfully on the causes and effects.

Sources of information are cited.

Patterns of Organization

Use the graphics below to help organize the body of your cause-effect essay.

next, and pizza another night. The average person eats out five times a week (Frey). Fast food is perfect for a hectic lifestyle because it is quick, cheap, and convenient. The health impact of fast food has many people of childhood obesity. Trans fat was, until recently, commonly found in fast food, and it has been linked to weight gain and increased risk of diabetes. In addition, many fast foods are packed with sugar, sodium, and calories, which can lead to high levels of cholesterol. Since today’s children eat fast food five times more often than their dad did in the 1970s, these health issues are being taken very seriously (Center for Disease Control). Fast food has caused changes in America’s economy, culture, and health, and the industry will continue to do so in the future. Moreover, fast-food businesses have shown they are willing to change in order to meet their customers’ demands. These chains have responded to customers’ requests for healthier options, and fast-food restaurants have begun to offer healthful options such as salad, fruit, and yogurt. Chains are providing food without trans fat, too. Whatever your opinion is of fast food, one thing is clear. Fast food is here to stay, and its impact won’t end any time soon.

Rediscovering the Power of Narratives

Student stories enrich all learning environments. Narrative writing offers the perfect outlet for such stories—with great potential for any classroom.

Let’s explore seven reasons to fall in love with narrative writing.

1. **Writing narratives is fun!**
   Narrative units invite students to write about a genuine topic of interest—themselves. Even our most reluctant writers enjoy bringing memorable experiences back to life.

2. **Narrative writing grows confident writers.**
   Writers of all abilities write more easily about subjects they know well. Narrative writing ensures students have a bank of prior knowledge to draw from.

3. **Narration teaches transferable writing skills.**
   Narrative structure—with its beginning, middle, and ending—is the core of all good writing, including explanatory and persuasive genres.

4. **Narratives build critical and creative thinking skills.**
   Students use creativity to imagine the pieces of their story and critical thinking to fit the pieces together into a compelling story.

---

Explore Narrative Topics

Imagine the fascinating stories these ideas prompt:

- A narrow escape from trouble
- I’ve done something that no one else has done.
- If only I would have listened!
- The most fun I’ve had recently
- A story about how I learned math
- The worst food I ever ate
- We couldn’t stop laughing!
- We got caught!
Narrative thinking boosts comprehension across the curriculum.
The same framework students use to build narratives can also help them learn difficult concepts in math, science, and social studies.

### Narrative Writing Across the Curriculum

- Imagine if students cast historical events as stories with characters, settings, conflict, and rising and falling action.
- Imagine if students framed scientific concepts as stories with plot. What would the plot of photosynthesis look like?

Narrative writing develops close-reading skills.
Reading and writing narratives have reciprocal benefits. Both processes build awareness of plot structure, setting, and characterization.

### Narrative Writing Across the Curriculum

- Imagine if students wrote short stories focused on a mathematical word problem centered on their lives and interests.

Narratives show students their experiences matter.
Sharing stories about their lives helps students make sense of the world and craft their own identities.

You’ll find plenty of strategies, guidelines, and lesson plans for narrative writing in every writing handbook from Thoughtful Learning.
Responding to Explanatory Prompts

Many district and state tests ask you to respond to an explanatory writing prompt. An explanatory prompt asks you to write to explain or inform about a topic, and to do so in a limited amount of time. That can be challenging because you can’t work like you normally do—spending as much time as you need from one step to another in the writing process. This chapter gives you the tips and guidelines you need to form an effective response to an explanatory prompt.

The handbook helps your students write clearer sentences and stronger paragraphs. It then moves students from paragraphs to short essays in the different modes of writing.

The new edition of Write on Track aligns with the latest standards and teaches close reading and on-demand writing. Write on Track helps your students read, write, think, and succeed in all their subjects.

Writing
Newspaper Stories

Sometimes, classes start their own newspapers. Students write news stories and human-interest stories. A news story reports on an important event. One example of a news story is a report on a recycling drive. A human-interest story reports on a topic that people will find interesting. A human-interest story might tell about a new student.

Stating Your Feelings

Another part of a student newspaper can include letters to the editor. A letter to the editor states the writer’s opinions about an important topic.

All Write

A Student Handbook for Language & Learning

$19.95
ISBN (softcover): 978-1-941660-44-7

All Write helps middle-school students catch up and move ahead, whether English is their first or second language. The handbook is very user-friendly and contains clear guidelines, models, checklists, illustrations, and tips designed to meet the needs of your students. Here are just some of the features you’ll find in All Write:

- Carefully chosen student essays, narratives, and arguments help your students improve their writing by modeling what other students have written.
- Clearly stated explanations and guidelines teach your students a variety of classroom skills—from note taking to test taking, from study-reading to thinking and speaking.
- Thoughtfully planned chapters improve students’ writing, thinking, and communication skills in science, social studies, and math.

An essay is a form of factual writing that includes more than one paragraph. In an informational essay, you share information about a topic. In one essay, you may do a lot of explaining. In another, you may do more comparing and contrasting or problem solving. The best informational essays contain many important details, including facts, examples, reasons, definitions, and quotations.

Writing an essay is really thinking on paper. Your teachers assign essays because they know this sort of writing allows you to explain what you know about important topics.

What’s Ahead

This chapter includes a sample essay, a graphic of basic essay structure, and writing guidelines. A special section at the end gives tips for writing essays about places, objects, and events.

Model Paragraph and Activity

Each unit includes multiple models of writing, from paragraphs to essays. Students read and respond to models and then complete activities that lead them through prewriting, writing, revising, editing, and publishing their own work.

Audio and video features make learning come alive.

Pop ups define key terms.

Clicking side notes highlights the key features of models.

The teacher view shows answers, standards correlations, additional resources, and much more!

Digital documents accompany each activity.
Inside Grammar

Are you looking for online, interactive curricula for grammar? These grade-level online units help students gain grammar skills. Students build sentences, work with the parts of speech, improve word usage, and apply the rules of punctuation. Think of these as online SkillsBooks with video instruction.

Each lesson starts with an instructional video followed by rules and examples. Two illustrated grammar activities and one writing activity help students practice what they learn. You can assign activities on paper or as part of a Google Classroom workflow.

You get Google doc activities, answers, standards correlations, and more teaching support. Each standards-based lesson is correlated to CCSS, LAFS, and TEKS.

Grades 2–10

Writing Complete Sentences

All sentences must have a **subject** and a **verb** and express a complete thought.

**Emily climbed** a ladder.

(The subject is **Emily**—what the sentence is about. The verb is **climbed**—what Emily did.)

A sentence **fragment** occurs when a group of words is missing a subject or verb (or both) or doesn’t express a complete thought.

*While she painted the wall.*

(These words have a subject (**she**) and a verb (**painted**) but do not express a complete thought. What happened while she painted?)

*While she painted the wall, she spilled some blue paint on the ground.*

(The incomplete thought is joined to a complete sentence.)

At first glance, a fragment may look like a complete sentence because it starts with a capital letter and ends with period. However, on closer inspection, you’ll see something essential is missing—a subject, a verb, or a complete thought.

**Find subjects and verbs.**

Read each sentence. Write down its subject and verb. Make a copy of this Google doc.

Critical thinking is careful thinking, measured and exact—the kind of thinking that someone like Albert Einstein did. And your brain is wired to think critically, too. Every day you must remember, analyze, and evaluate information both in and out of school. This chapter will show you how to strengthen your critical-thinking skills, preparing you not only to accomplish everyday tasks but also to take on complicated assignments. As Albert Einstein once said, “The whole of science is nothing more than a refinement of everyday thinking.”

You will learn . . .

Getting the Better of Your Emotions

Everyone has emotions. They help with all kinds of things, letting us know whether to warmly greet someone or to be wary and watchful. They narrow down the infinite possibilities of human action into a few appropriate choices. Emotions help us decide.

But sometimes they get the better of us, making us do things we regret later. A handful of simple techniques can help us recognize and regulate our own emotions and can help our students do the same.

Check the Emotion Thermometer

Start by identifying the emotion you are feeling: happiness, sadness, anger, hurt, love, fear, or something else. Then decide how strongly you feel the emotion, from 1 (very little) to 100 (totally). Afterward, ask whether you are comfortable with that intensity of emotion, and how you might make it better.

Student tip: Draw a thermometer shape and label the bottom as 1 and the top as 100. Then ask the student to identify the current emotion and color in the thermometer to show how strong it is. This visual helps you imagine and discuss the student’s internal feelings.

Calming Down with Deep Pressure

Sit upright in a chair. Cross your left hand over to clasp your right arm above the elbow. Do the same with your right hand on your left arm. Take a deep breath, clench your hands on your arm muscles, and hold for a count of 5. Release your breath and note how you feel.

Student tip: Demonstrate this technique in front of your class, have them try it, and discuss the results. In the future, when students are getting wound up, have them use deep pressure to calm down.
**5-5-5 Breathing**
Inhale very slowly through your nose for a count of 5. Exhale very slowly through your nose for a count of 5. Count to 5 once more, and then repeat the process. Continue to do so for a full minute (four cycles). Note how you are feeling.

**Student tip:** Teach this technique to help students calm themselves and focus at the start of class. It also has the benefit of quieting the room for a full minute.

**Progressive Relaxation**
Sit straight in a chair with feet flat. Curl toes up and hold for a count of 5, then release. Clench leg muscles for a count of 5, then release. Clench torso muscles for a count of 5, then release. Clench arm muscles for a count of 5, then release. Clench your whole body for a count of 5, then release. Note how you are feeling.

**Student tip:** Use this technique to help students work out jitters and relax their bodies. It also helps them center in their seats.

**Draw How You Feel**
Use pencil, pen, or crayons to draw a picture that expresses how you currently feel. You can draw a person with facial expressions and body language, a scene, an object, or even something abstract. Afterward, reflect on your feelings.

**Student tip:** When students draw their feelings, they must pause and think. They also make the invisible visible. This technique then helps them discuss their drawings and feelings.

In Focus

Improving Social and Emotional Intelligence, One Day at a Time

$29.95

ISBN (Grades 3–5): 978-1-932436-47-1
ISBN (Grades 6–8): 978-1-932436-48-8

The In Focus program provides you day-by-day and step-by-step instructions and activities for teaching social and emotional intelligence. The fun activities are easy to teach and take just minutes a day. You’ll find In Focus resource books for K–2, 3–5, and 6–8. And since this is a teacher resource, you need just one affordable book to teach all of your students!

Why teach social-emotional learning?
Research shows that students who learn to manage emotions and control impulses improve their learning in all classes. They feel less anxious and can better focus and collaborate. And students in schools that teach social-emotional learning score an average of 11 percentile points higher on standardized tests than students in schools that do not teach it.

Part 1: Creating Safety, Security, and Connection in the Classroom

The lessons in the first part of In Focus target the needs of the brain stem. These lessons aim to create safety, security, and connection in your classroom. This part of the brain has to be convinced that an individual is safe before the higher parts of the brain can be engaged.

Part 2: Identifying, Controlling, and Expressing Emotions

The next set of lessons focuses on meeting the needs of the limbic system. These activities teach your students to identify and manage their emotions and to use these skills as a catalyst for effective learning. The limbic system generates our emotions, and these emotions need to be focused, harnessed, and managed.

Part 3: Focusing, Managing, and Harnessing Emotions to Enhance Learning

The final set of lessons is geared to meeting the needs of the cortex and to developing higher-level social and emotional skills. It is the cortex that gives us the ability to think, reason, analyze, and self-reflect.

“In Focus is a great brain-based resource with quick, daily lessons that develop students’ and teachers’ social and emotional intelligence in just minutes a day. The lessons are doable and fun—no matter if you’re a language arts, math, or social studies teacher. I have seen a lot of social and emotional learning resources, and In Focus is one of the best that I have seen. I highly recommend this valuable resource!”

In Focus Online

$29.95 (Standard Edition)

* 1 year license

$99.95 (Premium Edition)

* 1 year license, includes 40 family/student seats

In Focus Online includes all of the great social-emotional learning you find in the books, but viewable on any screen with Internet access.

The Standard Edition contains 36 weeks of short, daily lessons (four per week) that teach the SEL skills your students need. Each lesson takes just 10–15 minutes per day, time you’ll get back with a class better able to focus and control impulsive behavior.

The Premium Edition gives you all that plus 40 family/student seats. Family members can do daily At-Home Activities and Student Reflections that parallel and reinforce classroom learning. That’s just $2.25 per family to extend SEL learning into the home environment.
